Why MVStart

What a Start-up looks for

In the beginning of a new business, entrepreneurs face many challenges in obtaining funds, hiring employees and protecting their ideas and inventions, both at a national level and internationally. At the same time, Startups want to know how to deal with red tape, charges with incorporation and registration, they have queries about tax, its procedures and payments deadlines.

Startups look for a partner that may advise them on all these questions and that is skilled in multiple legal fields, a partner that is able to answer promptly to any issue that may arise and leave the entrepreneurs with the time to what they do better – developing their business. We are that partner.

What we can do for Start-ups

At MVStart we are young and proactive team focused on the needs of startups developing their business in Portugal. We understand that startups often dwell in uncertainty on the legal requirements to put their business in motion and we can help making things clearer. We face your startup project like if it was our own and we have what it takes to help it rise from a blank sheet of paper into a successful project.

The MVStart team is particularly experienced in hiring and dismissal of workforce, patent and copyrights protection, tax matters and obtaining financing from public and private entities. We have the needed court experience, although most of times we advise to and successfully solve disputes with out of Court settlements.

“

Very efficient; detailed and rigorous when presenting solutions and dealing with issues; we were impressed.”

Chambers and Partners

“

The assessment of the market is that the firm punches above its weight, landing roles on a healthy number of deals boasting an impressive clientele of international and local banks.”
